Serial No.: 10/061,963 Attorney Docket No.: 20496-321

IN THE SPECIFICATION:

Please amend the paragraph beginning at page 4, line 6, as follows:

--The technical problems previously described are solved according to a first teaching of the present invention by a joint between two components having the features of Claim 1 comprising a matrix, located on at least one joint face, having an encapsulated reactive adhesive system. Further features are described in the sub-claims dependent on this.--

Please amend the paragraph beginning at page 10, line 1, as follows:

--According to a second teaching of the present invention, the problem described above is also solved by a component with at least one joint face having the features of Claim 24, in which the previously described features are implemented in the form of a matrix, located on at least one joint face, having an encapsulated reactive adhesive system.--

Please amend the paragraph beginning at page 10, line 9, as follows:

--According to a third teaching of the present invention, the problem described above is also solved by a method for producing a matrix having multiple capsules containing at least one material of the reactive adhesive system on a joint face of a component. having the features of Claim 26. Further features are contained in the sub-
